

Dynamics GP Supply Chain Series Inventory Control

Agenda

Curriculum Highlights:

- Inventory Setup Options
- Inventory Quantities Adjustments
- Creating a Stock Calendar and Stock Count Schedule
- Using ABC Analysis to Focus on Your Most Important Inventory Item

Synopsis:

This Course develops in-depth knowledge of the accounting functionality available in the module of Inventory Control. You will be simulating the setups you will encounter when setting up your system. You will be prepared to handle tasks such as creating and setting up items and pricing, handling daily and period-end procedures, and developing problem-solving techniques.

By actively participating in this class, you should learn how to:

- Set up the Inventory module, including creating items and price lists
- Use ABC Analysis to focus on your most important inventory items
- Enter adjustments to your inventory quantities
- Create a stock calendar and stock count schedule

Who Should Attend?

Customers wishing to learn the basic features and develop a working knowledge of the typical day-to-day procedures required to effectively use each Microsoft Dynamics Supply Chain Series
