2	Repair Utilities	3 1/2 hrs
3	Error Handling	4 hrs
4	Additional Programs and Topics	1 1/2 hrs
5	Review	1 hr
Total Time		13 hours

## Technical Support:

- The MAS 90 and MAS 200 Data File Structures class is a prerequisite for this class. This curriculum assumes a certain level of knowledge about the directory structure and file layouts of these systems.
- This class consists of discussion of concepts, review of Best Online Support and Services (BOSS) including the TRSG on the Web (Technical Reference and Support Guide), and hands-on activities. Throughout this class, you will be referred to the TRSG on the Web page as many of the concepts covered can be found in this feature.
- Although certain critical installation concepts are discussed in this class, installation issues, hardware configuration, operating system issues, and printing are covered in depth in the MAS 90 and MAS 200 Installation Class.
